

FOR IMMEDIATE RELEASE

Lachenaie, QC, Canada., June 1st 2006 // -- Nita Inc, a leading manufacturer of prepress automation equipment solutions launches the PRO-LESS plate stacker, automating the **processor less** plates!

NITA is very proud and fortunate to be among the first companies to offer a product that will help plate manufacture's impact the printing industry's future.

“Automation for Nita has been our bread and butter for the past nine years. Our partners recognize that we not only do this effectively but affordably as well. The Pro-less stacker is yet another perfect example of that”, says Claudio Napoleoni, Marketing Director.

The PRO-Less plate stacker offers many advantages. The first is footprint. It is placed directly at the CTP's exit and thus conveys, manipulates and stacks up to 100 plates and takes very little floor space.

The next advantage is versatility. The NITA PRO-Less stacker grows along with the printer. It can be used on both an 8 up as well as a 4UP platesetter without un-necessary upgrades. The design operates so smoothly that it easily manipulates plates 0.006”, 0.008”, and .012” thick in portrait or landscape modes

With the needs of the industry looking towards a cleaner, more environmentally viable solution to printing, Nita is helping its partners bring these solutions to the market. A processor less plate has many advantages, both environmentally and economically. The plate-setter manufacturers have made it possible to endorse this technology by allowing the plate manufacturers to perform several years of testing.

This is not a new concept, but rather a new technology which enables all printers to achieve this goal.

Using a plate without a processor, or a cleaner, or a wash unit has major impacts on the printer's bottom line. The chemistry dumping and replenishing cost is phenomenal way to positively impact a printer's bottom line! Not to mention the re-cycling of the chemistry waste.

“This technology is the way of the future in digital plates and will keep growing. Nita is very fortunate to part of the processes” – Normand Lord, President NITA Inc.
